PERCH Annotated eCRFs

Purpose: Contains all forms and question text with corresponding field names. Variables in <u>red</u> text represent <u>calculated variables located in the analytic datasets.</u>

The PERCH Core Team recommends using the calculated variables when they are available, in place of the raw variables, to ensure standardization across analyses.

For additional information on variables, including definitions and programming, see the Clinical and Laboratory Definitions Documents (insert filename). If it is necessary to create new calculated variables, please review the annotated eCRFs and Data Dictionary (insert filename) to identify the appropriate variables.

For questions regarding the PERCH datasets or derived variables, please contact the PERCH Core Team (cprospe1@jhu.edu and mhigdon@jhu.edu).

Segment (PROTSEG);
Visit Number (V ISNO);

If no blood, NP/OP, or urine specimens were taken, subm it a M issing Form's Request.

1. Child's weight category (check one): (CBUWEIGH) \square 1: <= 1 kg \square 2: > 1 kg to < 3 kg \square 3: >= 3 kg

Child's Weight	Total Volume	Blood Culture Bottle Volume	EDTA Tube #1 (CBC) Volume	EDTA Tube #2 (PCR) Volume	Plain/ Red Top Tube Volume
≤1 kg	3 ml	1 mL	0.5 mL	1 mL	0.5 mL
> 1 kg to < 3 kg	4.5 mL	2 mL	0.5 mL	1 mL	1 mL
≥ 3 kg	5 mL	2 mL	0.5 mL	1.5 mL	1 mL

In instances of limited blood volume, the following guidance applies in decreasing order of priority:

1) Blood cultures

CBC

malaria slides (for endemic sites)

HIV serology (for high prevalence sites)

- 2) Purple top tube for PCR, etc., (up to 1 mL max.)
- 3) If there is sufficient volume, any remaining blood should be placed in the red top tube $\frac{1}{2}$

When $< 3 \, m \, L \, of \, b \, Dood$ is collected from a patient, the following guidelines may be used:

Total Volume Available	Blood Culture Bottle Volume	EDTA Tube #1 (CBC*) Volume	EDTA Tube #2 (PCR) Volume	Plain/ Red Top Tube Volume
< 1 mL	all	0 mL	0 mL	0 mL
1 to < 2 mL	1 mL	0.5* mL	0 - 0.5 mL	0 mL
2 to < 3 mL	1 mL	0.5* mL	0.5 - 1 mL	Any remaining volume

2. Enrollment category *(check one)*:

(CBUENRCW)	Child had wheeze at admission AND the case defining signs of severe pneumonia resolved after 1 dose of bronchodilator treatment (< 2 yrs old) or after 1 - 3 doses (≥ 2 to < 5 yrs old).		Modified protocol: Collect blood and swabs only. Do not collect other specimens.
(CBUENRCN)	Either (a) child did not have wheeze, (b) child had very severe pneumonia, or (c) signs of severe pneumonia persisted after complete course of bronchodilator therapy.	\rightarrow	Proceed with standard protocol.
